R-22 refrigerant charge quantity for air conditioners & heat pumps: This air conditioning repair article series explains how overcharging or undercharging of refrigerant in an air conditioner or heat pump is detected and we list the effects of overcharged or undercharged refrigerant. We discuss how to diagnose refrigerant pressure problems; how to determine the proper refrigerant charge quantity. We also provide an ARTICLE INDEX for this topic, or you can try the page top or bottom SEARCH BOX as a quick way to find information you need. R-22 Refrigerant Data CFCS, ChloroFluoroCarbons - first generation refrigerants like R22 (1950s & later) were widely used in refrigerators and air conditioners. R22 was phased out in 2010 and is no longer widely available. R 404A and later R407c may replace R22 in some applications. Below this table of example refrigerant operating pressures for R-22, we provide links to complete refrigerant pressure/temperature charts as PDF files that you can download free. "charging charts" (such as the charge chart of the commercial unit shown here) are provided in service manuals to determine the target vacuum suction pressure (negative) and ocita pressure for a particular compressor engine. the oo of the charging chart for the specific compressor is the correct way to serve it. The following example pressures are based on "inch rows" that put you in the right ballpark if there is no charging chart at hand. real air compressor ocita pressure example: using the R-22 refrigerant and assuming an external air temperature of 85 °F required 120 °F inside the compressor (add 35 °F at the incoming air temperature) and a high-ocyte compression pressure of about 260 psi. real air conditioner example low side input or pressure of the suction line during operation: low side pressure during normal operationThe same model of the compressor and the refrigerant and the same external air temperature of 85 ° F required the temperature of 45 ° F entering the compressor (subtract 40 ° F from the incoming air temperature) that on the service diagram indicates that the inbound or intake extraction line The pressure would be about 75 psi. Example of a more theoretical air conditioner or pressure and temperature of the heat pump on the compressor and on the hood tube or on the thermostatic expansion valve: a during normal operation: at an external temperature of 72 ° F, liquid coolant (eg R12) outdoor condensation coil and enter into the cap tube or TEV could be at 100 psi and 95 ° F. These numbers vary according to the ambient temperature changes, compressor model and refrigerant gas used. On the lower side of the TEV or the cap tube (in the cooling coil in the air handler) where the liquid cooler is changing the state in a gas, it can be cooled at 10 ° F. And when the coolant leaves the cooling coil (bobin for evaporator) and returns to the compressor engine, it will be all steam and could be only 15 psi. [R12 Changes in the refrigerant from steam liquid to 14,6 psi to 10 ° F.] Air conditioner or equalization pressure of the heat pump refrigerant - system coolant pressure when measuring the heat pump or cooling system pressure make the same difference as where measuring the measurement is. When an air conditioning system or heat pump is turned off and it has been turned off for a while (30 minutes or more) the pressures equalized throughout the system between the high and low sides. At that point the pressure of the refrigerant both on the top and on the bottom side of the air conditioner or the pump system oipmese oipmese ref).erutarepmet erav a enoisserp al e enoizillobe id otump li escinfehd eht etnaregirfer led sag id opit lad atinfeid .Aras atazzilauqe o acitats etnaregirfer led enoisserp al .etneserp etnaregirfer sag eralocitrap led .Aterporp ella e etneibma aera'lled arutarepmet alla emrofnoc .Aras otmenanoizidnoc id ametsis nu id ossab otal e otla otal led inoizinfid iroiretru rep inoizinfid ertla e REES inoizatulav el eredeV .anretse aera'llen erolac id otnemirefsart li erenetto ad atla aznatsabba eresse eved elaretal arutarepmet atavele'L .erotarpave rep aniboh allen anretni aera'llad erolac id otnemirefsart li erenetto ad assab aznatsabba eresse eved elaretal arutarepmet assab al .ametsis led avitarepo arutarepmet al erarepus omaissop e elaretal enoisserp assab anu ehcna Aretnemua .atnemua otla otal lub enoisserp al ©AhcioP .°AoiC .amelbop nu id onges nu °A .ednamod e ednamoD id inoisserp e erottel led itemmnoC .aira'd irotanoizidnoc i rep enoizarpap id adiug al eredeV a Aretzini non o otnemadderffar id Aticapac al osrep ah erolac id ampom id ametsis li o atanoizidnoc aera out li es eredeV id agerp is .etnaregirfer id atidrep anu iah ehc o etailgabs onos etnaregirfer led inoisserp el ehc Aig as is eS etidrep elled enoizerroc al e IREIRGIRFER ETNARIRFER ETNAREIRFER etidrep elled e 22-R etnaregirfer led enoisserp alled enoizerroc enoizaregirfer id enoisserp id tset li .orbilac li eredeV .ametsis len etneserp etnaregirfer id Atitnauc al non .etnaregirfer led enoisserp al olos onocid it irbilac i .erolac id appop id otazzilauqe o aera'lled otmenanoizidnoc id ametsis len etnaregirfer led enoisserp al erarusim rep enoisserp id tset id irbilac onazzilutu is es ehc acifngis etnaregirfer sag led otmenatropmoc otseuq :aironemorP .avittiffe etneibma arutarepmet al e etnaregirfer sag isaisilauq rep atazzilauqe o acitats etnaregirfer led enoisserp al ereggel elibissop °A arutarepmet alled enoizerroc id ammagaid nu noc .isp 07 .Aras etnaregirfer led enoisserp al etneibma arutarepmet a isp 07 a etazzilauqe inoizidnoc ni idntuq jsag a otut' A non °AoiC .odiutqi etnaregirfer id 'op nu ais ic ehc odom ni aznatsabba - ametsis len etnaregirfer isaisilauq etnemacitarp ais ic ©Ahcirup .21R etnaregirfer oiheoc ocitarpais leuq See the compressor capacitor for an explanation of how itemirefir itemirefir e inoizatic erehdocsan o eratsom rep accile icincof tneimirefir e ac.elbaremun snolucudorP beW iremun ad atinrof °A otmemnoc id allesac artson al .odratir li rep esusc .erotaredom nu ad atavoppa atats °A ehc opod atazzilauvis Arrev enoizacilbbup al .bew knil nu eresse esetop es emoc erawtoss la adraug ehc otset nu o bew knil nu .enigammi'nu eneitnoc otmemnoc out li es .otadratir eresse °Aup otuges id otmemnoc id otletpepa'l :atoN aidepAtcepsnl id beW otis la acreC .etnematorp omerednospir e otos iug itemmnoC ied allesac allen otmemnoc nu o adnamod anu acilbbup .icsireferp es otos onappa acrecir id allesac al aidepattepsi'nu o adnamod anu ideihc ... aidepatanoizepsi acrecir anu o adnamod anu errop rep otuges id atavort acrecir id allesac al asu o erolac id emop e atanoizidnoc aera us olocitra id ecidni :italerroc ilocitra ilga ecidni otseuq eratlusnoc eruppO imelbop ied enoizavep id ilgisnoc e enoizarpap .jsongaid .tset .ilatneibma e enoizurtsoc id enoizepsi id enilno aidepolcineE - moc.aidepAtcepsnl us etnaregirfer led arutarepmet / enoisserp id icifarG 22R beW anigap atseuq rep enoizatic id itailgisnoc ilocitra itseuq eratlusnoc eruppO .otelpmoc olocitra id ecidni'l atlusnoc o italerroc etnematterts ilocitra ilgad otmenogra nu anoizeles o emoH - etnaregirfer led enoisserp a icifarg e eruttel ella ereggel a aunincoCotnemadderffar id imetsis id ipit irav onarepo iuc ni ehcipit erutarepmet elled enoissuscid anu rep CAVH avitarepo erutarepmet el eredeV .onretse'lla onretni'llad erolac li eratsops id aera'd erotanoizidnoc nu a otmesnoc otnemadderffar id ametsis len essab e ilaretal inoisserp el ©AhcrcP
